Natural Finish
(NAT)

#2342
Ashford De Lis
Planter XL
25"H x 25"W x 20"
Sq. Base

Shown in Verona
(VR) Finish

#2343
Ashford De Lis
Planter Large
20"H x 20"W x 16"
Sq. Base

#1710 Tribus Wall Ftn
38"H x 34"W x 17"D
Shown in French Limestone (FL) Finish

#572 Planum Straight Bench
75"L x 22"W x 19"H

#573 Planum Straight Bench
75"L x 22"W x 19"H

#574 Gryphi Straight Bench
75"L x 22"W x 19"H

#575 Gryphi Curved Bench
75"H x 22"W x 19"H

#576 Vitis Straight Bench
75"L x 22"W x 19"H

#577 Vitis Curved Bench
75"L x 22"W x 19"H

#578 Moderna Bench
34"H x 50"W x 26"D

Shown in French Limestone (FL) Finish

#579 Parkwood Bench
18"H x 62"W x 16"D

Shown in Two Tone (FL + VR) Finish

#580 California Bench
18"H x 62"W x 16"D

Shown in French Limestone (FL) Finish

581 "S" Curve Bench
20"H x 47"W x 20"D
Shown in Greystone (GS) Finish

#5011P Fuoco Square Fire Table with Propane Burner
#5011NG Fuoco Square Fire Table with Natural Gas Burner
24"H x 36"W x 36"D
Electronic Ignition • 65,000 BTU

Shown with Blue
Reflective Fire Glass.
Sold Separately.

#5102 Fuoco Propane Tank Cover
24"H x 21"W

Shown in Greystone (GS) Finish

Shown with Copper
Reflective Fire Glass.
Sold Separately.

#5012P Fuoco Rectangular Fire Table with Propane Burner
#5012NG Fuoco Rectangular Fire Table with Natural Gas Burner
24"H x 50"W X 25"D

Electronic Ignition • 65,000 BTU

HOW TO MAINTAIN FOUNTAINS:

Thank you for your purchase of a Giannini Garden Ornaments Fountain! In this care sheet you will find important information about installing and maintaining your fountain. Giannini products are made with the upmost care and best materials possible. With proper care and maintenance, your fountain will last for years and generations to come.

BASIC INFO:

- ~ Place fountains on a flat, solid base. Examples include: a concrete foundation, compacted gravel, or paver stones. Fountains need to be on a level surface to operate correctly.
- ~ Fountains with a large one-piece pond basin, (48" diameter and up) the basin must be placed on a soft surface like sand or gravel (not dirt). If a pond basin is to be installed on a hard surface like concrete or pavers, a 1"-2" layer of sand must be applied over the surface. The sand will help with leveling by allowing the basin to settle and be completely supported, reducing the risk of possible stress cracks due to uneven support. Sand can be grouted after installation to prevent and run-off.
- ~ Fountains do not require a permanent water line as Giannini fountains come with recirculating pumps. Fountains can be filled using a hose, bucket, etc. when needed.
- ~ You need to have electrical outlet in close range to the location of the fountain. Giannini pumps have a three prong plug and the cord length is usually 12 ft long, so the outlet needs to be fairly close. Fountain pumps should only be plugged into a GFCI protected, outdoor outlet.
- ~ Water level must be full to the rim AT ALL TIMES (not doing so will cause the concrete to shock and crack). Giannini is not responsible for cracked items after delivery or pick up.
- ~ During the winter months, protect your fountain from harsh or freezing weather by draining the fountain and covering it with a weather proof tarp, or dismantle fountain and store indoors. This will protect your fountain from cracking and/or severe damage. REMOVE WATER FROM FOUNTAIN DURING PROLONGED FREEZES. FREEZE DAMAGE WILL VOID YOUR GIANNINI WARRANTY.
- ~ Never fill a bowl with water when it is hot to the touch (doing so will shock the concrete and crack). Fill the bowl in the early morning or at night when it is cool out.
- ~ Keep the water pump clear of leaves and debris so that it does not get clogged
 - *Clean pump filter at least once a month, depending on the area the fountain is. In heavily wooded areas, the pump needs to be checked and cleaned more often.
- ~ If the fountain develops algae or build up, drain the water from the fountain and scrub off with a brush or soft carwash sponge. Try not to scrub too hard or vigorously. Doing so may cause the stain to come off. Rinse after algae is scrubbed off.
 - *To prevent algae build up, use an algae reducer solution, such as **Fountec or CrystalClear-Sparkle**, to reduce any build up. Do not use Chlorine or any other pool chemicals! Chlorine and most pool chemicals will damage the fountain and pump.
- ~ Hard water should be filtered before filling your fountain: you can use a hose-attached prefilter, such as the **PreFresh Spa & Pool Water Fill Filter**, available online or at a local swimming pool supply store. In areas with severe hard water, only distilled water should be used to fill your fountains. Filtering the water will not remove all mineral content in hard water, lime scale and white residue can still appear on your fountain, which should be removed immediately.
- ~ Any white residue (white scale, lime scale, calcium buildup, or efflorescence) that builds up on the fountain **should be removed immediately.** This buildup is normal and unavoidable in areas with a high mineral content (hard water) in the local water supply. The best way to remove any white residue would be to gently scrub a mixture of **Protec** or (**CrystalClear-SubLime**) and water along the surface of the fountain. A mixture of 3 parts white vinegar and 1 part water will also work and removing any white residue. Failure to remove any white residue will stain and/or damage the fountain. Adding **Protec** or **SubLime** to the fountain's water will help in softening the hard water, regular use in accordance to the instructions is EXCESSIVE WEIGHT OR PRESSURE ON FOUNTAINS AND/OR STATUARY MAY CAUSE THEM TO FALL. KEEP CHILDREN AND OTHERS FROM CLIMBING, SITTING OR LEANING ON YOUR FOUNTAIN AND/OR STATUARY ITEMS. ALL GIANNINI WALL FOUNTAINS HAVE AN ATTACHMENT POINT BEHIND THE TOP HALF OF THE WALL FOUNTAIN. ALL WALL FOUNTAIN TOPS MUST BE SECURED TO WALL, FENCE, etc. FOR STABILITY. SIGNATURE MEANS FULL UNDERSTANDING AND RELEASE OF LIABILITY FOR GIANNINI GARDEN ORNAMENTS:recommended. Giannini Garden Ornament's warranty does not cover damage due to white scale, lime scale, calcium buildup, efflorescence, or freeze damage. Please thoroughly review this care sheet for more information.
- ~ Most fountains have no interlocking component parts. The component parts are held together by gravity only. Gluing or cementing the component parts together is not recommended. The parts may need to be dismantled to replace the pump, hardware, or to move the fountain to another location.

CAUTION:

- ~ EXCESSIVE WEIGHT OR PRESSURE ON FOUNTAINS AND/OR STATUARY MAY CAUSE THEM TO FALL. KEEP CHILDREN AND OTHERS FROM CLIMBING, SITTING OR LEANING ON YOUR FOUNTAIN AND/OR STATUARY ITEMS. ALL GIANNINI WALL FOUNTAINS HAVE AN ATTACHMENT POINT BEHIND THE TOP HALF OF THE WALL FOUNTAIN. **ALL WALL FOUNTAIN TOPS MUST BE SECURED TO WALL, FENCE, etc. FOR STABILITY**

FINISH AND COLOR VARIATIONS

The colors represented in our catalog give you a range of what our finishes look like. They will never be exactly like shown because photography, lighting, and the printing process, changes the tone of the colors. We know from experience the impossibility to guarantee the homogeneity of the finish of our product. Through the manufacturing process, our garden ornaments are treated in a way that give them certain unique characteristics. All of our garden ornaments are hand-poured and finished manually, therefore they vary according to many factors: how long the piece has been cured, the weather on the day it was finished, who is doing the finishing, and the texture of the piece. All these factors add to the uniqueness and authenticity of our garden ornaments.

No two items look alike. Variations are completely normal. Our finishes are made to look like they have always been in your garden or that you found them on an antiquing trip. The finish will also be enhanced with the passage of time and weather exposure, and will pick up their own natural patina.

THE AGING PROCESS

We are often asked how to speed up the normal aging process of our garden ornaments. It is best to start with a natural cement ornament that has not been treated, painted, or sealed. Through research and experience we have come up with the following methods: you can encourage the growth of moss by wetting the piece thoroughly and brushing it with either plain yogurt with active culture, beer, buttermilk, or sour milk. If possible, place your ornament in a shady place. You may need to repeat the process. You can also age our ornaments by using diluted water based paint. Brush your ornament with the paint and wipe off the excess with a rag or sponge. Use a dark green to obtain a mossy look or a dark brown to obtain an old stone look. You can also use a combination of colors depending on the look you want to achieve.

PREPARING FOR THE ARRIVAL OF YOUR FOUNTAIN

You need to prepare a concrete pad or another solid surface for your fountain in a size appropriate for the fountain you choose. You need an outdoor grounded outlet ready to plug into your electric pump. You can fill your fountain with buckets or a garden hose. You do not need to have a water source attached to your fountain as the pump recirculates the water. Most fountains have no interlocking component parts. The parts are held together by gravity only. Gluing or cementing the component parts is not usually recommended. The fountain may need to be dismantled to replace the pump, hardware, or to move the fountain to another location. Excessive weight or pressure on the fountain may cause it to fall. Keep children, pets, and others from climbing, sitting, or leaning on the fountain and its components.

MAINTAINING YOUR FOUNTAIN

All Giannini Garden Ornaments should be handled with care. Keep the water level in your fountain filled to the rim or your fountain could crack. Do not fill your fountain with cold water when the fountain is hot to the touch. Cold water in a hot fountain can shock the concrete and make it crack. Fill the fountain bowls in the early morning or in the evening when your fountain has cooled down. Never let your fountain run dry or the pump will be ruined. During the winter months, protect your fountain from harsh or freezing weather by draining the fountain and covering it with a weather proof tarp or dismantle it and store indoors. This will also help protect your fountain from cracks.

WARRANTY

After delivery or pickup, Giannini will not be responsible for any broken or damaged items. Make sure that you or the people handling the products are careful with all the merchandise. If there is a manufacturer's defect, we will replace the defective item. Giannini guarantees the items for six months on your floor for retailers, or six months after you or your customer purchases the item. Giannini will not be responsible for any mishandling of our merchandise.

COPYRIGHT NOTICE
